ABOUT M-TECH

Founded in 2013, M-TECH provides wide range of services that includes engineering, procurement and execution to the oil & gas, petrochemicals & industrial cities.

Through fiscal responsibility and ethical practices, M-TECH aims to offer high quality services and deliverables. What separates us from the competition is the attention to detail and personal attention that each client and each project receives.

MISSION STATEMENT

It is the mission of M-TECH to provide quality services to oil & gas, petrochemicals companies & industrial cities in Saudi Arabia and GCC.

Through our core values, we aim to compete with the top names in the industry while maintaining excellence in service and standards.

OUR VALUES

INTEGRITY

Ethical behavior is the cornerstone of M-TECH. We have built our company on a reputation of honesty and fairness. We pride ourselves on doing the right thing at the right time for the right reason. Through integrity, we solidify the connection that we build between M-TECH and our clients.

FISCAL RESPONSIBILITY

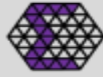

Being cost aware is crucial to our business. At M-TECH, we focus not only on managing our own costs, but our clients' costs as well. Our clients projects remaining financially viable is just as important to us as our own profitability. Our company cannot prevail without our clients' continued success.

SAFETY

At M-TECH, we embedded the safety in our values, coming from our believe that success can not be achieved without safety.

MAINTENANCE & REPAIRING SERVICES

MAINTENANCE & REPAIRING SERVICES

FRP WRAPPING & COMPOSITE REINFORCEMENT REPAIR

It is a high strength, field-applied composite system that is used for structural reinforcement of damaged piping. It is a wet layup, fiber-reinforced polymer (FRP) system that consists of custom blended epoxy and unique fiber reinforcements tailored for piping repair.

These products are suitable for pipes with leaks or which may develop leaks. A broad line of unique epoxy matrix systems and fabrics are available to handle a wide variety high heat applications, harsh chemical environments, and cool installation temperatures.

VALVES OVERHAULING & REPAIR

We are doing servicing of many types of Industrial Valves. with well-equipped team and outstanding expert work force, the unit provides both onsite and offsite servicing activities whether the requirement is for one valve or for a complete plant.

MAINTENANCE & REPAIRING SERVICES

Pressure Safety Valve – TREVI Test

Online testing of steam relief safety valves. A load cell is mounted with electronic DC motor puller on the valve's stem top. This pulls the stem thereby trying to lift the disc. The net result is that the valve pops at a pressure set pressure less electronic pressure calculated on the basis of disc area.

Pressure Hydro-Test

Fully pressure testing unit is designed to conduct the pressure test ON SITE & in house as well. Suitable to test different types of hoses, pipes, cylinders, Etc. The system generates an automatic test report and certificate indicating the parameters of the test.

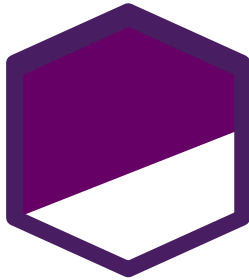

Technical Support & Manpower Supply

We have supplied professional and experienced engineers, skilled and semi-skilled technicians and workers to companies and contractors worldwide in the oil and gas and petrochemical industries especially from all line of our services

MAINTENANCE & REPAIRING SERVICES
